

## How to change your screen resolution in Windows XP

Step 1 Right Click on the Screens background. Left Click [Properties].

Step 2 Click on the [Settings] tab  
Under [Screen Resolution] (bottom left),  
Slide the pointer towards [More] or [Less].  
Watch the small screen to see how this action  
will change the icons, fonts, etc... Click [OK]

Step 3 Click [Yes] to accept the changes or [No] to reject the changes.
